PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience building secure, scalable cloud-native platforms and distributed data-processing systems across financial services, logistics, insurance, and enterprise software. Expertise in Java, Python, GCP, AWS, microservices and data engineering, including production use of Apache Flink and Apache Beam and reusable frameworks for both. Focused on performance, delivery automation, reliability and team mentoring.

CORE SKILLS

- Java 8–21, Python, Spring Boot, microservices, REST APIs
- AWS: S3, IAM, Lambda, CloudWatch, compute and storage
- Docker, Kubernetes, Jenkins, CI/CD, DevOps, observability
- React, Angular, AngularJS, VueJS, Kotlin
- Agile/Scrum, technical leadership, mentoring, code reviews
- GCP: BigQuery, Pub/Sub, Cloud Storage, Composer/Airflow, Dataflow
- Apache Flink, Apache Beam, streaming/batch data, ETL/ELT
- OAuth2, JWT, IAM, Kafka, API security
- Oracle, MySQL, MongoDB, Hibernate, JUnit, Selenium

PROFESSIONAL EXPERIENCE

IBM India Pvt Ltd — Chennai, India | Client: American Express, USA

Senior Software Engineer • Oct 2025–Present

- Design and operate cloud-native financial services using Java 21, Spring Boot, Python and GCP.
- Build reusable Apache Flink and Apache Beam frameworks and maintain streaming/batch pipelines, transformations and distributed processing patterns.
- Use BigQuery, Pub/Sub, Cloud Storage and Cloud Composer/Airflow for orchestration, reliable data movement, analytics and downstream integrations.
- Develop event-driven services; handle performance tuning, observability, debugging and production support; mentor a 5-member team.
- Use GitHub Copilot, ChatGPT and Claude selectively for development, investigation and documentation.

Tech: Java 21, Python, Spring Boot, GCP, Flink, Beam, BigQuery, Pub/Sub, Cloud Storage, Airflow, Docker, Kubernetes, Jenkins

Tecaholic Solutions — Sunrise, Florida, USA | Client: American Express, USA

Senior Software Engineer • Mar 2024–Aug 2025

- Designed high-performance Java/Spring Boot fintech microservices on GCP and integrations with BigQuery, Cloud Storage and Pub/Sub supporting 2M+ daily transactions.
- Reduced release times by 45% through CI/CD automation and backend latency by 30% through caching, asynchronous processing and tuning.
- Supported 99.9% uptime and SLA adherence with distributed US/India teams; developed Python/SQL utilities for validation, transformation, reconciliation, data-quality analysis and troubleshooting.
- Improved ingestion and analytical workflows, containerized deployments, logging, monitoring and production issue analysis.

Tech: Java, Spring Boot, Python, GCP, BigQuery, Pub/Sub, Cloud Storage, SQL, Docker, Kubernetes, Jenkins, CI/CD

Sintec Informatik GmbH — Germany

Senior Software Engineer • Dec 2022–Jun 2023

- Led backend/frontend delivery for Java/Spring Boot services and AngularJS applications; designed secure REST APIs using OAuth2 and JWT.
- Contributed to AWS integration and cloud delivery patterns (S3, IAM, compute, monitoring), Jenkins/GitHub CI/CD, automated quality checks, code reviews and mentoring.

Tech: Java, Spring Boot, AngularJS, REST, OAuth2, JWT, AWS, S3, IAM, CloudWatch, Jenkins, GitHub

Treasury Intelligence Solutions GmbH — Heidelberg, Germany

Software Engineer – Full Stack (R&D) • Nov 2020–Oct 2022

- Enhanced IAM, secure authentication/authorization and role-based access control for treasury systems supporting 50K+ enterprise users.
- Implemented Docker/Jenkins CI/CD pipelines reducing manual release effort by 60%; addressed penetration-test findings and supported AWS infrastructure, monitoring and containerized deployments.

Tech: Java, Spring Boot, Hibernate, IAM, OAuth2, AWS, S3, CloudWatch, Docker, Jenkins, CI/CD

Form Solutions GmbH — Karlsruhe, Germany
Full Stack Developer • May 2019–Oct 2020

- Delivered React/VueJS and Spring Boot solutions, integrated backend services with MongoDB, evaluated Kotlin React/VueJS, and contributed code reviews and Agile/Kanban practices.

Tech: React, VueJS, Java, Kotlin, MongoDB, AWS, Gerrit, Junit

Hermes Germany GmbH — Hamburg, Germany
Software Developer (DevOps) • Sep 2018–Apr 2019

- Built CI/CD pipelines reducing deployments from hours to under 30 minutes; developed Java/Spring microservices for logistics handling 100K+ parcels/day and implemented Grafana/Kibana monitoring.

Tech: Java, Spring, CI/CD, Grafana, Kibana

Arvato SCM Solutions — Bertelsmann SE & Co. KGaA, Germany
Software Developer – Solution Design • Sep 2016–Aug 2018

- Built digital enterprise solutions for Volkswagen, Porsche, Audi and Zurich Insurance, including Java Spring MVC services, Angular/AngularJS applications and Kotlin/Docker deployments.

Tech: Java, Spring MVC, Angular, Kotlin, Docker, MySQL

Arvato SCM Solutions — Bertelsmann SE & Co. KGaA, Germany
Intern Software Developer • Jun 2016–Aug 2016

- Developed an internal Resource Planning Portal using Java Spring MVC and Angular; configured Docker containers and supported deployments.

Tech: Java, Spring MVC, Angular, Docker

EDUCATION

MSc, Data & Knowledge Engineering
Otto von Guericke University Magdeburg, Germany • 2016

BTech, Computer Science Engineering
JNTU Hyderabad, India • 2012

CERTIFICATIONS & LANGUAGES

Certifications: Professional Scrum Master (PSM I) • Google Cloud Fundamentals (in progress)
Languages: English — Fluent • German — Fluent

TECHNICAL FOCUS

- Cloud-native architecture
- Streaming and batch data engineering
- Data pipeline frameworks
- API security and identity management
- DevOps and release automation
- Performance and reliability engineering
